

Making Good Governance Easier

eShare

At eShare we use software to help you raise your standards of governance and give you more time, whilst reducing costs and reducing risks.

eShare provides a framework within which good governance practice can be carried out. It makes organising and preparing for meetings easier, manages other governance aspects such as risk and appointments, ultimately saving time.

Managers, board members, governors, executives, clinicians, committee members and administrators are freed to focus on core activity, decision making, and ultimately, raising standards in patient care.

eShare Product Suite

The eShare system has six core modules. It is modular, fully flexible and customisable.

eMeetings

Make meeting information a resource, not a burden. Simplify the creation, distribution and maintenance of meeting information. Save secretariat resource, committee time, and minimise paperwork.

- Reduce secretariat workload
- Distribute documents, meeting invitations and agendas in one-click
- Save senior resource by maintaining version control documents in a centrally accessible place
- Manage and view pre and post meeting activity status
- Increase transparency for all interested parties

eDecisions

Ensure decision making is managed effectively and consistently. Centralised, collaborative platform where everyone can access and contribute to good decision making

- Full audit trail of all activity
- Search past decisions
- Ensure processes are followed correctly
- Central store to document all decisions and decision-making processes.

The UK's leading provider of governance software.

Simple to use, centrally accessible tool to:

- Plan and co-ordinate meetings and meeting knowledge
- Ensure actions are documented and completed
- Manage decision making effectively
- Simplify documentation distribution, review and approval
- Manage and devolve risk
- Manage appointments

"A key benefit of eShare was it streamlined the whole meeting process. Not just the preparation, but the meeting itself and the maintenance of the reference resource."

"eDecisions provides a rich environment including a structured precedent database making it easy to find comparable precedents"

"it's simply a more effective way of working for all. It helps all of us do our jobs better and quicker."

eKnowledge

A truly searchable, centralised knowledge base. Give all stakeholders access to the information they need, maintain effective version control, and collaborate effectively on updating and approvals.

- Collaborate to produce documentation
- Eliminate the need for a paper database
- Auto alert stakeholders to relevant documents
- Single place to store and access key information
- Search for the information you need

eControls

The effective way to implement risk management. A centralised workspace where people can issue, review and update risks reviews and actions.

- Manage risks with minimal resource
- Maintain a full audit trail for all activity
- Ensure activities are devolved yet still completed on-time
- Have assurance that correct procedures have been followed
- Maintain a central register of risks, and risk registers for individual committees

eAppoint

Manage appointments effectively.

- Maintains a drill down appointments register.
- Manages and devolves all appointment activity.

eView

Simplify the process of required public disclosure. Create a public access website to publish selected activities, information and documents that are managed and stored in your eShare system.

- Ensure complete transparency of information and procedures to members and the general public
- Publish meeting minutes, documents, agendas etc.
- Full content control with no technical expertise required
- Version history to changes to web pages
- Content approval process

“Implementing eControls brings significant changes to the governance process, helping us to maintain and better control all activities.”

“Management and others have one centrally maintained database of papers....All information is searchable and forms part of the broader eShare knowledge base.”

“It’s simply a more effective way of working for all. It helps all of us do our jobs better and quicker.”

“Until you start using the system yourself, you don’t really appreciate how sophisticated it really is and how much it can do for you.”
