

Cost Saving Example

The following data is taken from an existing eShare client with one committee comprising 20 members (mix of executives and NEDs*), meeting x8 per year, and typically considering 40 risks and 25 decisions per year.

They value secretariat time at £30 per hour and committee member time at £50 per hour.

The client is now making savings of £42,800 every year.

The trust has identified that this deployment, combined with the savings, has enabled them to:

- Free up secretariat time for other governance jobs
- Free up executive and NED time spent asking and searching for information
- Add new headcount they couldn't previously afford – in this case a risk officer
- Develop a more efficient decision process

“To be able to raise standards and improve governance whilst at the same time increasing efficiency made the Trustees decision to implement eShare easy.”

For more information, and to find out how your trust could achieve similar savings and efficiencies, contact us today:
