

# eDecisions

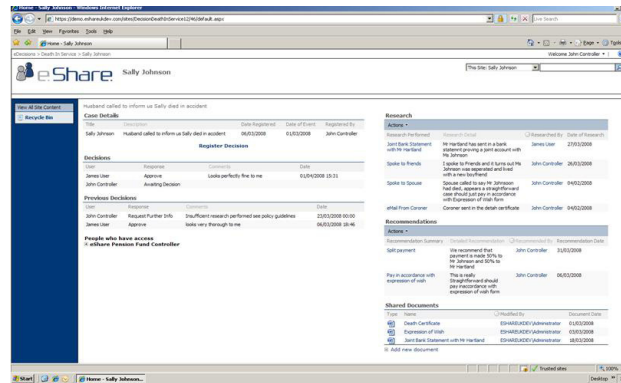

## Improve the speed and consistency of decision making

Ensure all decisions are managed simply, efficiently, consistently and are well documented with eDecisions.

### Individual decision workspace

Users can create workspaces for new decisions, or click through into existing decisions and view all the information relating to that decision. This helps to increase transparency to the decision making process by providing information including:

- Case details
- Research
- Recommendations
- Shared documents
- The final decision
- Discussion notes

The eDecisions homepage provides a list of decision types which are specified by the client. By clicking on a decision type you get access to:

- Decisions log to all related decisions
- Rules and procedures
- Decision checklist
- A discussion board
- Shared documents
- Useful links

And a full archive of previous decisions means new decisions are made with full reference to available precedent information.

### A Complete Board Assurance Solution

Combine eDecisions with our other modules to create a complete solution to meet all your Board Assurance needs. Available modules include: **eMeetings**, **Knowledge**, **eControls**, **eView**, **eAppoint** and **ProcedureManager**.

### How eDecisions will benefit you

Decisions are managed consistently

Decision making is quicker

Collating decision information is simplified

Easy to review similar precedent decisions

You have an audit trail to decisions if required

Improves transparency

Overall standard of decision making is improved
