

eView

An easy way to meet public disclosure commitments

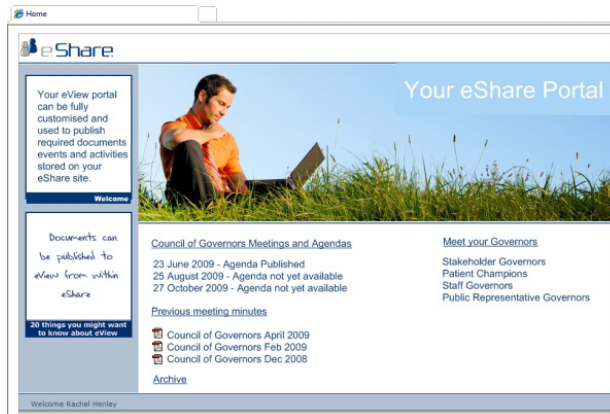

eView has been developed to enable our clients to make governance information, such as meeting minutes and agendas, accessible to staff or the public.

Public access website

eView is a public access front end to eShare which allows you to publish information in eShare to a wider audience. You can publish as much or as little activity within eShare as you choose.

Documentation is published within a well presented webpage for your Trust, which can also be linked to your main website or intranet, or be used standalone.

You can produce additional web pages and edit those pages too.

With eView, you are able to take charge of all content of your eView site, editing the text and content of each page. The functionality also includes:

- Email alerts when content changes
- Process driven publication
- Live editing
- Full version history
- Content approval and publishing

Producing and maintaining this public disclosure website is as easy as editing a word document.

How eView will benefit you

Greater transparency

Enhanced communications

Easy, cost effective website

Easy access to relevant information

Full content control with no technical expertise

Version history to changes to web pages and documents

Content approval process to changes
