

Press Release

eShare sponsors HSJ NHS Governance Forum

eShare, the leading provider of governance software, is sponsoring the Health Service Journal 5th Annual NHS Governance Forum.

The HSJ 5th Annual NHS Governance Forum brings together national authorities on NHS governance and leads from across the country, sharing their invaluable insights. Delegates have the opportunity to network with colleagues from across the country and put their most pressing questions to governance experts for discussion and debate over three exciting days.

The eShare solution is developed specifically to address the needs of trust based organisations that are accountable to their memberships and have stringent governance frameworks. It makes organising and preparing for meetings easier, saving time and eliminating unnecessary paperwork.

“We look forward to meeting some of the many NHS professionals attending this exiting event, finding out about their governance issues and sharing our best practice experience of reducing the administrative burden and improving governance process management.” Says Alister Esam, Managing Director, eShare.

eShare will be exhibiting at the show and conducting a Health Governance Survey which all delegates are invited to participate in. The results will be published later this year.
